$$C: \quad x^3+y^3+z^3=0 \quad \subset \mathbb{P}^2_{\mathbb{C}}$$

$$\mathrm{Flex}(C) = C \cap \{xyz=0\}, \qquad t^3=-1, \qquad \alpha = e^{\pi i/3} = \frac{1+i\sqrt{3}}{2}.$$

Each panel is a complex parameter plane on one coordinate line.

● 3 real flexes ● 6 nonreal flexes
